

FUNDAMENTALS OF FACE READING

Our bodies speak without words. They are like walking billboards, communicating our thoughts, feelings and living history. The face is a map, and the eyes are a map. They both reflect who we are, states of health, genetic tendencies, personality qualities and traits and more. Face reading is fun and fascinating. It's a valuable assessment tool easily integrated with iridology. Face Reading can expand and catapult the understanding of yourself and others on many levels. Learn how to read the face like a book.

Canadian Jackie Latimer is fascinated with the wisdom of the human body and its many holographic maps and messages. She enjoys the journey of self-discovery and understanding how to read the language of your body.
