The Study of Iridology

Iridology is the Study Of The Patterns And Markings In The Iris Of The Eye. For over a hundred years, various Iridologists have studied these patterns and markings, correlating them with specific health problems, physical strengths and weaknesses and personality traits. Through these empirical observations, Iridologists have noted certain constitutional patterns. That is to say, people with similar eye patterns tend to have similar personality traits and health profiles. These observations are the basis for **Constitutional Iridology Analysis.**

Some people believe that the eye is a mirror of what is going on in the body right now and hence, have endeavored to use Iridology as a diagnostic tool to determine specific disease conditions. *Constitutional Iridology is based on the premise that the patterns and markings in our eye are primarily genetically inherited.* Hence, in Constitutional Iridology, no attempt is made to diagnose any specific disease conditions. *Constitutional Iridology is used to help us understand our basic temperament so we can know how to balance our nutrition and lifestyle to obtain greater physical, mental and emotional fitness.*

An Iridology analysis is for everyone, but not everyone is ready for it. It is a truth that health is not given but earned. There is no doctor in the world that can give health. When health is lost, or when one wishes to build a finer mind and body, there must first be education and knowledge and then comes an application of knowledge which is doing. *The greatest single thing the analysis can do is point out one's inherent weaknesses.* We die from our weaknesses. Our weaknesses bring us down, lower our resistance to all diseases and leave us vulnerable to other problems.

An Iridology analysis will show you a way to improved health by showing you what to take care of. This is a guide, a plan to start with.

What Can Iridology Do For Me?

Iridology can tell you if an organ is overactive or underactive, if there is a problem with your skin or circulation, if there is lack of Calcium or Magnesium in your body or if there are problems in your colon. Each line, color, spot or discoloration in your iris means a great. For instance, a line would be perceived as a Radii Solaris, a hole would be perceived as a Lesion (weakness/sluggishness) and a colored spot may be perceived as a sulfur or drug settlement/chemical deposit within your body.

In order to tell if an organ is overactive (acute condition) or underactive (subacute, chronic or degenerative condition) a trained Iridologist will use a flashlight and magnifying glass to view the iris. He or she may also take iris slides and later view them through a slide projector using an Iridology chart, thus enabling the Iridologist to locate the areas of strengths and weaknesses in your body.

An *Acute* or overactive condition in your body would be seen as white in your iris. An acute condition is a condition that is active, meaning there might be discharge or pain as occurring during cleansing (a Cold) or Arthritis (pain in the joints). A *Subacute* condition would be seen as an area slightly darker than the normal color. This would be a light gray which denotes a slightly sluggish area. A *Chronic* condition would be seen as a darkened area such as a medium brown color. This would denote a chronic condition in the body or a condition that has been a problem for quite some time. Most individuals do not realize symptoms before they are in the chronic condition. This is when most conditions surface and cause the most problems. Lastly, a *Degenerative* condition would appear as a blackened area. This is when the cells do not repair themselves and can lead to the end of life if not taken care of properly. Many of the fatal diseases are found in the degenerative area.

Therefore, Iridology is extremely beneficial in realizing areas in the body which are strong and weak.

Iridology Classes Offered

Correspondence Courses

Iridology Correspondence Courses are available anytime and anywhere in the world on video tape or DVD.

Beginning Iridology

Do you know how to read your irises? Learn the following:

1. The History of Iridology and Specific Iridology Signs.
2. The difference between blue, mixed, and brown irises.
3. How Herring's Law of Cure Affects Us.
4. What Iridology Does for Us.
5. Recognition of the Eye and Study of the Iridology Chart.
6. Seven Zones of the Body, Four Disease Stages, Four Levels of Inflammation.
7. Four Problems People Have, Four Elimination Channels.
8. The Reversal Process, The Ideal Diet, How the Attitude Affects The Body.

All these items will be covered and more. Learn how to do Iridology for general signs. Supplies are available for purchase. Handouts are provided.

Intermediate Iridology

Follow up to the Beginning Iridology class to further strengthen your skills and do Professional Iridology. Learn the following:

1. Review Iris Signs and Iridology Chart.
2. Find Iris Signs in each Participant for each Iris Sign and each System.
3. Learn how to do a Constitutional Iridology Analysis.
4. Learn how to do an Iris Analysis using the 8 Systems of the Body: Digestive, Elimination, Immune, Circulatory, Respiratory, Urinary, Skeletal, Hair Skin & Nails. Learn what organs are in each system and how to tell which system is not functioning properly by looking at the iris for only a minute. Learn which Herbs/Vitamins/Minerals are Necessary to Promote Growth in each system.
5. Learn how to Detect Growths.
6. Learn how to Detect Where Minerals are Deficient.
7. Learn how to Detect where Inflammation is Causing Symptoms.
8. Compare Beginning and After Iris Slides of Instructor and Participants to Learn the Consequences and Benefits of Lifestyle Changes.

All these items will be covered and more. Handouts are provided. Supplies are available for purchase.

Advanced Iridology

Follow up to the Intermediate Iridology class to do Professional Iridology and Become Certified. Learn the following:

1. Review Constitutional Iridology Signs and do an Analysis from Beginning to End on Each Participant in the Class.
2. Learn How to Draw the Iris of Each Participant in the Class.
3. Learn How to do Iris Analyses from Photos.

4. Learn How to do Iris Analyses from Drawings of Previous Analyses.
5. Learn How to Take Iris Photos.
6. Do 12 Case Studies by Examining Slides and Determining Strengths and Weaknesses in Each.

All these items will be covered and more. Handouts are provided. Supplies are available for purchase.

(Once all three levels are Completed, Certification is Provided.)

Make An Appointment Today!

1. Determine what state of health your body is in.
2. Find out how you can improve your nutrition and your health.
3. Find out if your program is the correct program for you.
4. Increase your knowledge of how your body functions.
5. Have one or all of the services provided at your home.

Iridology, Nutrition and Muscle Testing Office Consults\$60 per hour
In-Home Consults\$60 per hour + mileage
In-Home MeetingsTBD
ClassesTBD
