Advanced Iridology Practitioner Course

This class is intended to follow our [Iridology Course Series \(Beginning, Intermediate and Advanced Iridology\)](#) that we use to certify anyone who wishes to be certified in iridology as a Certified Iridologist. This class is intended to be a Level 4 class. The great thing about this class is after you pass it you can hold the title of "Advanced Iridology Practitioner" which will give you more confidence and more credibility in the field of iridology. I will clarify that the iridology course series is on DVD or videotape and this Advanced Iridology Practitioner is online with powerpoint slides and audio.

This course brings in not only teachings from Dr. Bernard Jensen but also European Iridology teachings from Ellen Tart-Jensen. Learn the latest research in Iridology. Learn how to do iridology just by the genetic markings in the iris.

The following is covered in this Advanced Iridology Practitioner Course

1. Welcome
2. Definitions of Iridology
3. How Iridology Began in the 1850's by Hungarian Physician
4. Comparison of Jensen and European Iridology Signs and Types
5. Charts
 - Older Iridology Charts
 - Body Chart
 - Mercedes Colburn's Canine and Feline Grid
 - Canine Iris
 - Feline Iris
 - Equine Iridology Chart by Equine Iridology EU
 - Equine Iris
 - Sclerology Chart
 - Sclerology Signs
 - Physical Behavioral Iris Chart
 - Dr. Jensen's Iridology Chart
 - Ellen Tart-Jensen's Iridology Chart
 - Iridology Controversy
 - Changes in Terminology
 - Rings in the Iris
 - Iris Zones
 - Anatomy of the Eye
6. Pupil Tonus Signs
 - Pupil Spinal Map
 - Pupil Tonus Signs: Mydriasis – Large Pupils
 - Pupil Tonus Signs: Miosis – Small Pupils
 - Pupil Tonus Signs: Hippus – Pulsating, Extreme Change from Mydriasis to Miosis
 - Pupil Tonus Signs: Unequal Pupil Diameters – Anisocoria
 - Pupil Tonus Signs: Frontal Flattening
 - Pupil Tonus Signs: Ventral Flattening
 - Pupil Tonus Signs: Lateral Temporal Flattening
 - Pupil Tonus Signs: Medial Nasal Flattening

- Pupil Tonus Signs: Superior Temporal Flattening
- Pupil Tonus Signs: Superior Nasal Flattening
- Pupil Tonus Signs: Superior Temporal and Nasal Flattening
- Pupil Tonus Signs: Inferior Nasal Flattening
- Pupil Tonus Signs: Inferior Temporal Flattening

7. Placement of the Collarette

- Balanced Collarette
- Constricted/Tight Collarette
- Atonic, Distended Collarette
- Quality of the Collarette
- Thick and Ropey Collarette
- Thin and Wispy Collarette
- Absent (Not Visible) Collarette
- Shape of the Collarette
- Jagged or Star Shaped Collarette
- Double Collarette
- Intermittent Collarette
- Other Types of Collarettes
- Square Wreath Collarette
- Collarette with Frontal Indentation (Prolapses of Transverse Colon)
- Meerscham Collarette Wreath
- V-Line/Parallel Tracks Collarette
- Angle of Fuchs Collarette

8. Pigments in the Iris

- Straw Yellow
- Dirty Yellow
- Orange
- Fluorescent Orange
- Dark Brown
- Rust
- True Red
- Yellow Lipid Deposits in the Sclera (Pinguecula)
- Brown Pigments in the Sclera of a Blue or Biliary Eye
- Brown Pigments in the Sclera of a Hematogenic Eye
- Tarry Black

9. Pigment Terms in the Iris

- Hetero
- Heterochromia
- Hypertrophic
- Hypertrophic Sectoral Heterochromia
- Partial Sectoral Heterochromia
- Central Heterochromia
- Hypotrophic
- Hypotrophic Sector

10. Levels of Inflammation: Shading/Reactivity

- White
- Light Gray
- Dark Gray
- Black
- Perifocal Lightening

11. Iris Sign Descriptions

- Radial Fibers or Trabecula(e)
- Rarification of Rarefaction of Fibers
- Lacuna (Plural = Lacunae)
- Crypts
- Defect Signs
- Cords
- Reflective Signs
- Perifocal Lightening
- Transversals
- Vascularized Transversals
- Osseous Netting
- Radial Furrows
- Contraction Furrows
- Funnel
- Tophus/Tophi/Flocculations/Lymphatic Rosary
- Scurf Rim
- Uric Acid Sign
- Cholesterol Ring/Annulus
- Circulatory Ring
- Pinguecula
- Pterygium

12. Resiliency/Constitution

- Very Resilient: Strong Constitution
- Resilient: Medium Constitution
- Moderately Resilient: Medium-Weak Constitution
- Mildly Resilient: Weak Constitution
- Shading/Reaction: Acute, Subacute, Chronic, and Degenerative
- Density/Resilience: Strong, Medium, Medium-Weak, Weak Constitution

13. Iris Constitutions

- Lymphatic – Blue Eye
- Biliary – Mixed Eye
- Hematogenic – Brown Eye

14. Iris Subtypes Based on Color

- Lymphatic Iris Constitutional Subtype Based on Color – Overacid
- Lymphatic Iris Constitutional Subtype Based on Color – Febrile
- Lymphatic Iris Constitutional Subtype Based on Color – Hydrogenoid
- Lymphatic Iris Constitutional Subtype Based on Color – Uric Acid Diathesis
- Lymphatic Iris Constitutional Subtype Based on Color – Scurf Rim
- Biliary Iris Constitutional Subtype Based on Color – Ferrum Chromatose/Tiger Striping
- Biliary Iris Constitutional Subtype Based on Color – Hydrogenoid
- Hematogenic Iris Constitutional Subtype Based on Color – Ferum Chromatose/Tiger Striping

15. Lymphatic Iris Constitutional Subtypes Based on Iris Structure

- Neurogenic Subtype Based on Iris Structure in Lymphatic Eye
- Anxiety Tetanic Subtype Based on Iris Structure in Lymphatic Eye
- Polyglandular Subtype Based on Iris Structure in Lymphatic Eye
- Connective Tissue Subtype Based on Iris Structure in Lymphatic Eye

16. Biliary Iris Constitutional Subtypes Based on Iris Structure

- Neurogenic Subtype Based on Iris Structure in Biliary Eye
- Anxiety Tetanic Subtype Based on Iris Structure in Biliary Eye
- Polyglandular Subtype Based on Iris Structure in Biliary Eye
- Connective Tissue Subtype Based on Iris Structure in Biliary Eye

17. Hematogenic Iris Constitutional Subtypes Based on Iris Structure

- Neurogenic Subtype Based on Iris Structure in Hematogenic Eye
- Anxiety Tetanic Subtype Based on Iris Structure in Hematogenic Eye
- Polyglandular Subtype Based on Iris Structure in Hematogenic Eye
- Connective Tissue Subtype Based on Iris Structure in Hematogenic Eye

18. Lipemic Diathesis Corneal Sign

- Lipemic Diathesis in a Lymphatic Eye
- Lipemic Diathesis in a Biliary Eye
- Lipemic Diathesis in a Hematogenic Eye

19. Case Studies

- Tricia – Case Study #1
- Lona – Case Study #2
- James – Case Study #3
- Sylvia – Case Study #4
- Ovidiu – Case Study #5
- Debi – Case Study #6
- Charlotte – Case Study #7
- Arthur – Case Study #8
- Laura – Case Study #9
- Mark – Case Study #10
- Mirella – Case Study #11
- James – Case Study #12
- Joshua – Case Study #13

- Brenda – Case Study #14
- Josephine – Case Study #15
- Elaine – Case Study #16
- Family – 3 Generations: Male – Case Study #17
- Family – Father, Mother, Son – Case Study #18
- Family – 3 Generations: Female – Case Study #19
- Family – Father, Mother, Daughter – Case Study #20
- Family – Father, Mother, Daughter, Son – Case Study #21
- Tricia 28 Years Ago – Case Study #22

20. Miscellaneous

- SD8004 Super Digital Iridology 24.2MP Iridology and Sclerology Camera System Training
- ASEA and Renu28 Product Information
- References
- Conclusion

There is also the following included in this course:

1. 165 Powerpoint Slides
2. 165 Powerpoint Note Pages
3. 7 hours of Audio Recording/Training
4. Practice Manual
5. Photo Manual with 10 Sets of Irises
6. Test Manual
7. Course Support by the Instructor
8. Final Exam (both written and over skype or zoom with instructor)
9. Complete Certification
10. Board of Registered Nursing Approved and Certified

Once you have completed and passed this course at 95% or better you will receive a certificate stating you are an “Advanced Iridology Practitioner”.
