

## **Celltem**

Cell Metabolism RNA and DNA Fortification and Regulation

### Areas of research

Autism Spectrum/ ADD-ADHD  
Cancer/Cell Mutations  
Chemical Exposures  
DNA and RNA based Vaccination  
Genetic Disorders  
Radiation Exposure  
Cachexia

### **DNA and RNA are the backbone to life and its expression**

Nucleotides are the basic fundamental structures in DNA and RNA. DNA is made of four types of nucleotides, which are linked covalently into a polynucleotide chain (a DNA strand) with a sugar-phosphate backbone from which the bases (Adenine, Cytosine, Guanine, and Thymine). Together these base pairs form a helix structure. When paired, these chains of nucleotides creates a unique set of instructions for every human cell on the planet.

### **Genes interact with our environment and cancers**

As the onslaught on our cells becomes ever compounding due to toxins, stress, EMF, and overall life, it is no mistake that damage to the our genes can become apparent. All cancers arise as a result of changes that have occurred in the DNA sequence of the genomes of cancer cells. Over the past quarter of a century much has been learnt about these mutations and the abnormal genes that operate in human cancers. We are now, however, moving into an era in which it will be possible to obtain the complete DNA sequence of large numbers of cancer genomes. These studies will provide us with a detailed and comprehensive perspective on how individual cancers have developed.

Cancer is responsible for one in eight deaths worldwide. It encompasses more than 100 distinct diseases with diverse risk factors and epidemiology which originate from most of the cell types and organs of the human body and which are characterized by relatively unrestrained proliferation of cells that can invade beyond normal tissue boundaries and metastasize to distant organs.

### **DNA and RNA Vaccination**

DNA or RNA Vaccination technology is not new. DNA vaccination has become the fastest growing field in vaccine technology following reports at the beginning of the 90's that plasmid DNA induces an immune response to the plasmid-encoded antigen in contrast to vaccines that employ recombinant bacteria or viruses, genetic vaccines consist only of DNA (as plasmids) or RNA (as mRNA), which is taken up by cells and translated into proteins. The long term effects of DNA and RNA vaccinations on humans have not completely been studied however, which brings much controversy as to the future of this technology.

**Celltem is a homeopathic regulation remedy designed to address cell metabolism at the central core, the nucleus. Homeopathic remedies in the form of sarcodes(Imprints of healthy tissue) have also been added to homeopathically induce favorable cell response on both DNA and RNA and its reparation according to homeopathic theory.**

**Disclaimer: Nucleic products does not take liability for any misuse of this informational material. Information of our products is for educational purposes only and pulled from research journals cited. References to action of homeopathic drugs can be found in the Homeopathic Pharmacopeia of the United States. These products and informational documents are not intended to diagnose, treat or mitigate any disease. This product has not been evaluated by the FDA.**

## **Materia Medica of Homeopathic Ingredients**

### Excerpts from the Materia Medica by Dr. Henry Clarke and Dr. William Boericke

**Carbo Vegetabilis 9X, 13X, 200C-** A Vegetable Charcoal Clinically used for Angina Pectoris. Aortitis. Breasts, erysipelas of. Bronchitis. Burns Constipation. Debility. Diarrhoea. Distension. Dysentery. Gangrene. Haemorrhages. Haemorrhoids. Hair, falling out. Headache. Heart, diseases of. Irritation. Laryngitis. Lungs, congested. esophagitis.

**Anilinum 9X, 200C** -Aniline having a marked affinity for cell nuclei is clinically used for Anæmia. Cancer. Cholera. Eczema Rubrum.

**Radium Bromatum 12X, 15C, 200C-** An important addition to the Materia Medica, especially since the provings by Diefenbach have precisionized its use. Found effective in the treatment of rheumatism and gout, in skin affections generally, acne rosacea, nævi, moles, ulcers and cancers.

**Millefolium 13X, 200C-** Clinically used for Cancer. Chlorosis. *Consumption*. Dysmenorrhœa. Enuresis. Epilepsy. Fistula lachrymalis. Hæmatemesis. Hæmaturia. Hæmoptysis. Hæmorrhages. suppressed. Milk or absence of it, *Nose, bleeding of*. Puerperal convulsions. Rodent ulcer. Sterility.

**Medulla Ossis Suis 3C, 7C, 9C-** Homeopathic Sarcodes of healthy tissue from Medulla. . In Greek the term 'Sarcodes' means fleshy. Sarcodes, sometimes referred to as organotherapy, are homeopathic remedies prepared from healthy tissues. Sarcodes contain information of biological structures of an organ and by resonating the organs substance energetically (homeopathically) its natural healing energy is stimulated. Thus, removing toxins and optimizing organ function.

**RNA 5C, 8C, 34C-** Homeopathic Sarcodes of Ribo Nucleic Acid. In Greek the term 'Sarcodes' means fleshy. Sarcodes, sometimes referred to as organotherapy, are homeopathic remedies prepared from healthy tissues. Sarcodes contain information of biological structures of an organ and by resonating the organs substance energetically (homeopathically) its natural healing energy is stimulated. Thus, removing toxins and optimizing organ function.

**DNA 6C, 8C, 34C-** Homeopathic Sarcodes of Deoxyribose Nucleic Acid. In Greek the term 'Sarcodes' means fleshy. Sarcodes, sometimes referred to as organotherapy, are homeopathic remedies prepared from healthy tissues. Sarcodes contain information of biological structures of an organ and by resonating the organs substance energetically (homeopathically) its natural healing energy is stimulated. Thus, removing toxins and optimizing organ function.

**Methylene Blue 9C, 200C-** Clinically used for Albuminuria. Cancer. Cystitis. Epithelioma. Gonorrhœa. Hemicrania. Kidneys, affections of. Malarial fever. Neuralgia. Neurasthenia. Pleurisy. Rheumatism. Rheumatoid arthritis. Spasms. Spinal irritation. Suppuration.

**Abrotanum 200C-** Clinically used for Boils. Chilblains. Epilepsy. Gout. Haemorrhoids. Hectic fever. Hydrocele. Indigestion. Lienteria. Marasmus. Myelitis, chronic. Nose-bleed. Paralysis. Rheumatism. Umbilicus, oozing from. Worms.

**Calcarea Oxalica 200C-** Clinically has been found useful in allaying the pains of cancer.

**Conium Maculatum 200C-** Clinically used for cancerous diathesis. Arterio-sclerosis. Caries of sternum. Enlarged glands. Acts on the glandular system, engorging and indurating it, altering its structure like scrofulous and cancerous conditions. Tonic after grippe. Insomnia of multiple neuritis.

**Euphorbia Corollata 200C-** Clinically used for Death-like faintness and exhaustion.

**Euphorbium Officinatum 200C-** Clinically used for Bone, diseases of. Cancer. Cataract. CEyes, inflammation of. Gangrene. Headache. Heartburn. Peritonitis. Syphilis. Teeth, affections of. Toothache. Ulcers. Vision, disorders.
