Stop taking regular Vitamin C! Most commercial brands of Vitamin C only contain ascorbic acid, not the non-acidic, mineral-buffered form of Vitamin C called mineral ascorbates, found in **Emergen-C** Vitamin C Drink Mix.

We are now selling **Emergen-C** to all our customers. Mineral ascorbates, the true Vitamin C, are produced naturally in the livers of 99.9% of all animals, but not in humans. Vitamin C, in the form of mineral ascorbates, has countless advantages over pure ascorbic acid. Mineral ascorbates are neutral (non-acidic) and have no adverse side effects, unlike high levels of ascorbic acid which may cause heartburn, nausea, flatulence, diarrhea, and excess urination, inducing loss of minerals. Most health seekers are unaware that ascorbic acid is only an intermediate form of Vitamin C. What they really need are seven fully reacted mineral ascorbates found only in Emergen-C.

High in Potassium, **Emergen-C** provides a powerful antioxidant to the 70 trillion cells in the body along with a full complement of B Vitamins and 32 mineral complexes that replenish valuable electrolytes.

Raspberry Emergen-C fizzes in water to furnish 1,000 mg of Vitamin C with 32 different mineral complexes plus B Vitamins.

At the first sign of a cold take Emergen-C and see what happens. You will be surprised how it helps your immune system overnight become stronger to fight off infection faster. Contact Brenda at the number above for more information or to order your pack.
