Kathy Norris Bio

It was in 2002, she joined IIPA, became certified, and attended her first symposium in 2003. From that moment on she was dedicated to iridology education and learning as much as she could about this fabulous science.

In July of 2009 she joined the IIPA Board of Directors as the Treasurer and worked her way up the ranks to becoming an IIPA President and IIPA Instructor Coordinator simultaneously. It was in 2011 she decided it was time to take what she had learned and pass it forward by helping students achieve what she had set her goals towards.

Today, Kathy works at writing lessons for students, teaching iridology students and working with Certified Iridologists in teaching advanced classes. She is still very devoted to working with her clients, but teaching is her passion. And teaching the client is part of the iridology process.

For those interested in further education related to iridology you may be interested in:
